#	Item	Qty	Rate	Tax	Amount
	Email + Dashboard notification system				
	Location-based & category-based filtering				
	Privacy-controlled contact sharing				
	SEO-optimized pages				
	Fully responsive design (Mobile / Tablet / Desktop)				
	3. Module-wise Functional Scope				
	3.1 Live Bidding Module				
	Purpose				
	To enable customers to post project/product/service requirements and receive private bids from verified vendors.				
	Key Features				
	Separate registration & dashboards for Customers and Vendors				
	Customer can post:				
	Project				
	Product				
	Service				
	Asset requirement				
	Auto vendor matching based on:				
	Location				
	Category (Solar / Wind / Other)				
	Vendors receive notifications for matching projects				
	Vendors can submit bids				
	Bid Visibility Rules				
	Vendors cannot see other vendors' bids				
	Only Customer and Admin can view all bids				
	Bid amount remains confidential				
	Public listing shows only project cards (no pricing)				
	Admin Controls				
	Approval of:				
	Project postings				

#	Item	Qty	Rate	Tax	Amount
	Vendor bids				
	Vendor/customer profiles				
	3.2 Custom Handling Agent Module				
	Purpose To connect customers with logistics, shipping, and custom handling agents.				
	Key Features				
	Independent registration & login for Customers and Agents				
	Agent profile cards displaying:

	Contact details visible only with active subscription				
	In-platform contact & messaging system				
	Notifications				
	Email + dashboard alerts for agents when contacted				
	Message management inside Agent dashboard				
	3.3 Solar Loan Module				
	Purpose To connect solar project owners with financial institutions and loan providers.				
	Key Features				
	Separate registration & dashboards for:				
	Loan Takers				
	Loan Providers				
	Loan requirement posting by customers				
	Auto-notification to relevant & nearby loan providers				
	Loan providers can:				
	Accept				
	Reject requests				

#	Item	Qty	Rate	Tax	Amount
	Paid subscription mandatory to contact customers				
	Important Note				
	Platform will not handle:				
	KYC				
	Documentation				
	Loan processing				
	Integration				
	Solar Financial Partner page linked to Solar Loan module				
	Loan providers onboarded through partner page				
	3.4 Solar Insurance Module				
	Purpose				
	To connect insurance seekers with solar & wind insurance providers.				
	Key Features				
	Separate registration & dashboards for:				
	Insurance Takers				
	Insurance Providers				
	Insurance requirement posting				
	Provider notification system				
	Accept / Reject request flow				
	Paid subscription required to contact customers				
	Platform acts strictly as a connector				
	3.5 Assets, PPA, Sale & Purchase Module				
	Purpose				
	To support high-value renewable energy transactions.				
	Includes				
	Solar Plants				
	Wind Plants				
	PPAs (Power Purchase Agreements)				
	Large Assets				
	Key Features				

#	Item	Qty	Rate	Tax	Amount
	Seller & Buyer registration and dashboards				
	Vendors can list:				
	Complete plants				
	PPAs				
	Buyers can browse and contact sellers				
	Mandatory admin approval for all listings				
	Designed for enterprise-scale transactions				
	3.6 Government & Private Tender Module				
	Purpose				
	To publish and manage renewable energy tenders.				
	Key Features				
	Registration & dashboards for:				
	Tender Providers				
	Tender Seekers				
	Tender listings with:				
	Description				
	Category				
	Deadlines				
	Contact option for interested users				
	Admin moderation and approval				
	4. Admin Panel Capabilities				
	Admin will have centralized control over:				
	User & vendor approvals				
	Content moderation across all modules				
	Subscription plans & payments				
	Notification management				
	Reports & analytics (users, listings, activity)				
	Module-wise access control				
	5. Non-Functional Requirements				
	Fully responsive UI				
	Secure authentication & authorization

	1. Multi Language website				
	2. Multi Currency				
	3. Become An Investor Page				
	Purpose				
	The Become An Investor module is designed to connect individual and institutional investors with verified solar and wind energy opportunities listed on SolarWindMart.				
	This page allows investors to discover, evaluate, and connect with project owners, asset sellers, startups, or companies seeking investment in renewable energy.				
	User Roles in This Module				
	1. Investor (Individual / HNI / Company / Institutional)				
	2. Investment Seeker (Vendor) (Solar plant owner, wind project owner, startup,				

#	Item	Qty	Rate	Tax	Amount
	EPC company, asset owner)				
	3. Admin Role				
	Registration & Login Rules				
	• Separate registration & login for:				
	o Investor				
	o Investment Seeker				
	• Login must be independent from other modules				
	• Separate dashboards for:				
	o Investor				
	o Investment Seeker				
	• Admin approval mandatory for:				
	o Profile activation				
	o Investment listings				
	o Investor verification				
	1. Investment Opportunities (it is a Section in page)				
	Investment seekers can list opportunities such as:				
	• Solar power plants (existing or under construction)				
	• Wind power plants				
	• Rooftop solar projects (commercial/industrial)				
	• Renewable energy startups				
	• EPC expansion projects				
	• Asset acquisition opportunities				
	• PPA-based revenue projects				
	• Hybrid solar + wind projects				
	Each opportunity card should show:				
	• Project type (Solar / Wind / Hybrid)				
	• Location				
	• Capacity (MW)				
	• Expected ROI (range)				
	• Investment range (multi currency according to user's location)				
	• Project stage (Proposed / Running / Expansion)				
	• Short description				
	No sensitive financial documents publicly visible				
	2. Investor Dashboard Features				
	Investor should be able to:				
	• Register & login				
	• Select investor type:				
	o Individual				
	o Company				
	o Institutional				
	• Set preferences:				
	o Solar / Wind / Hybrid
